

MEMORANDUM
Comfort Lake-Forest Lake Watershed District

To: Board of Managers
From: Mike Kinney
Subject: AIS Update

Date: October 20, 2017

Background / Discussion

There will not be a regular AIS Update in the October 26th board packet, nor a presentation at the October 26th meeting. No major activities have occurred since the October 5th update. The watercraft inspection season has come to a close and the inspection survey data from the DNR is now available. Staff will work on compiling this data, along with a summary of other AIS activities from this year, into a full 2017 AIS Yearend Report. We plan to bring this to the November 16th board meeting, and Mike Sorensen will give a presentation at that time.
