2021 Lake Levels

Lake levels ranged over a total of 0.44 feet; between a minimum of 910.28 feet on June 15, 2021, and a maximum of 891.80 feet on October 18, 2021.

2021 Temperature Profiles

The lake was stratified from mid-May through mid-October.

2021 Dissolved Oxygen Profiles

The lightest blue represents the duration and depths where no oxygen is present and sediment phosphorus can be released and contribute to internal loading.

Internal loading was possible throughout the growing season, and bottom P concentrations were high by August
