

MEMORANDUM
Comfort Lake-Forest Lake Watershed District

To: Board of Managers

Date: April 7, 2022

From: Mike Kinney

Subject: 2021 Progress Report Presentation

Background/Discussion

Staff will present on the 2021 Progress Report at the April 14th board meeting. Given the length of the report, staff will not be able to comprehensively cover each section of the report in this presentation. Staff proposes to focus on providing a status update for each of the District's nine priority lakes, particularly with regard to progress toward meeting (or maintaining) state water quality standards and District goals.

Managers are encouraged to send staff any questions or comments in advance of the meeting. Staff can present on additional sections of the report as requested.

As a reminder, the Progress Report, Annual Report and Year in Review will be recommended for board approval at the April 28th regular board meeting (once monitoring data and audited financials are finalized). While the Progress Report and Year in Review have no formal deadline, the approved Annual Report must be submitted to the state by April 30th.
