

MEMORANDUM

Comfort Lake-Forest Lake Watershed District

Date: May 29, 2024
To: CLFLWD Board of Managers
From: Mike Kinney, District Administrator
Subject: Floodplain Vulnerability Assessment Workshop

District Wide

Background/Discussion

The Board held a workshop on May 2nd to review the first phase of mapping for the Floodplain Vulnerability Assessment. The Board directed staff and EOR to re-categorize the pollution sensitivity of near surface materials layer from the “social” category to the “environmental” category, to revise the resulting maps, and to review the revised maps with city engineers. Staff and EOR met with city engineers for Forest Lake, Wyoming, and Scandia. Staff will present an update during the board workshop.

Once the Board reaches consensus on the priority mapping, staff recommends the Board discuss the Community Engagement phase. Staff has been in communication with a community engagement consultant, Zan Associates. Dan Pfeiffer will join the workshop at 3:00 pm to answer any questions the Board may have.
