Earned grant revenue = grant revenue that has been spent

Unearned grant revenue = grant revenue that is in the District's bank account, but hasn't yet been spent (carries forward each year until grant is spent up; reference figure only/not factored into total)

Note: Grants require a minimum match (in some cases 20% of total project cost, in some cases 10% of total project cost)

NOTES

- Earned grant revenue = grant revenue that has been received and spent
- Unearned grant revenue = grant revenue that is in the District's bank account, but hasn't yet been spent (carries forward each year until grant is spent up; reference figure only/not factored into total)
- 2025-2033 grant revenues assume staying on track with 1/3 of program/project expenditures funded by grants.
- Large-scale expenditures including volume control facility, wetland banks, land acquisition, and office space are taken out of expense projections. Recommend adding these back into the budget once revenues are secured.

Loan D is necessary if District wishes to disburse an additional \$500,000 in loan funds because Loan C cannot be amended to exceed \$750,000.

The District cannot begin disbursement on a new loan until it has closed out disbursement on a current loan

NOTE: Years 2026-2031 have compounded repayments from multiple loans, resulting in >\$500,000 in loan repayments. See 2021-2027 Projections page for estimated impacts on expense-revenue breakout

NOTES

Auditor who works at Redpath confirmed we can levy for future loan repayments, not just what is due that year

In reality, levy payment is actually lower than levied (usually receive approx. 98%, because a small percentage isn't received due to delinquent taxes). In this case we can set the Debt Services levy to exactly \$350K, then the General Fund gets lowered proportionately with the total levy

*Debt Services levy to exceed loan repayment for four years, building a reserve for future loan repayments

*Government Budgets, and the levies needed to support them, are always for the coming (next) year. However, the basis for the levy (i.e., the Estimated Market Value (EMV) and Net Tax Capacity (NTC) data) is from the year prior to the budget year. E.g., the 2023 budget year line above indicates the 2022 EMV and 2022 NTC because the 2023 EMV and 2023 NTC are not yet calculated.

Blank spaces are datapoints where information/files are not readily available. Tax base records prior to 2014 are not readily available.

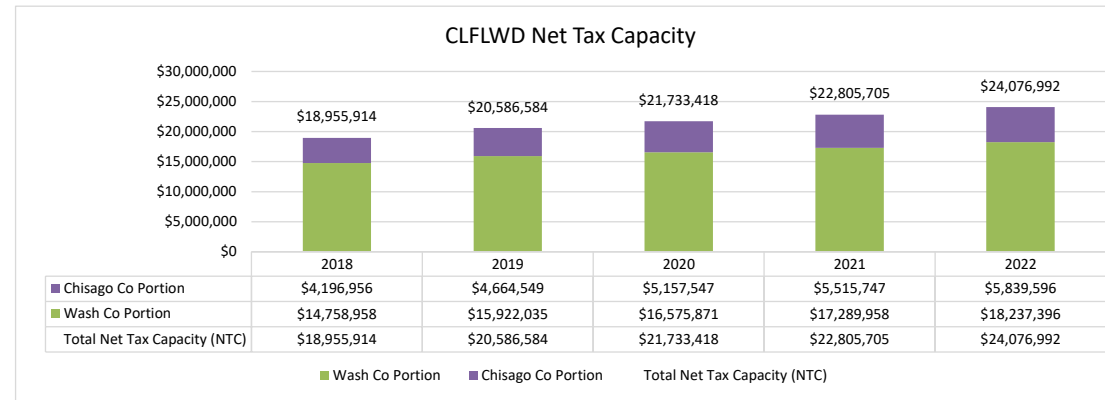

The District's tax levy prior to 2014 was relatively low and relatively flat for several years. From 2002-2008 the levy was approximately \$250,000. From 2009-2015 the levy was \$755,000.
