

January 2026 Minutes Revisions

January 8th, 2026: No revisions made since originally posted.

January 22nd, 2026: Revisions made as follows:

98 President Anderson indicated she received calls from concerned Comfort Lake
99 residents regarding the fast speed of the Blue Water Science regular meander survey
100 boat. Mr. McComas explained how he performs aquatic plant surveys, including a
101 meandering path with numerous sample points. He indicated that the survey boat
102 isn't able to go very fast due to the amount of visual observations and rake sampling
103 that are required, but it is faster than the point intercept survey method.
